

BUILDING SERVICES

Manufacturers of Mechanical & Electrical Supports

BUILDING SERVICES

Our Company

At WEB we have over 20 years of experience in design, fabrication and supply of mechanical and electrical support systems.

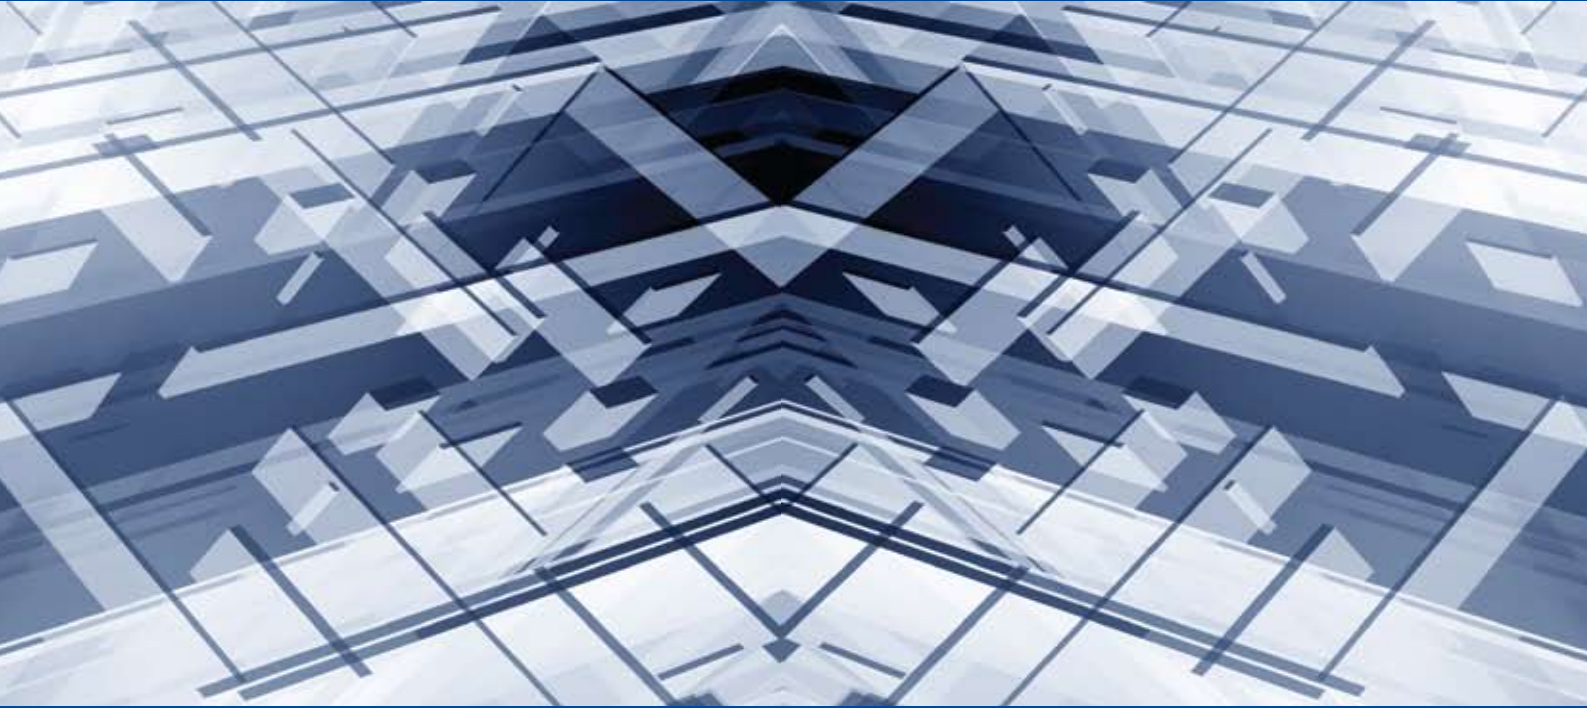

Drawing on this experience and knowledge we have been able to help consultants and contractors involved with specialised supports in the electrical and mechanical aspects of building services.

However our customer support doesn't end with design and fabrication, as a division of WEB (M&E) Products we carry extensive stocks of everyday consumables as well as many specialist items, plus we pride ourselves on finding those difficult to locate products which are not 'off the shelf' and ensure they are delivered with the minimum of delay possible.

You can be assured of considered, helpful advice whatever the electrical or mechanical product need you may have and where circumstances arise, if we are able to show cost effective alternatives, we will - **that's our commitment to you.**

Typical Applications

Heavy duty service module fabricated with Unistrut containing mains water flow and return and steam pipe.

Gas boiler module fabricated with Unistrut.

Pipe blocks supporting pipework and providing protection against penetration of roof membrane.

Mechanical Service Riser Module fabricated with steel hollow section and powder coated.

BUILDING SERVICES

Pre-fabrication and pre-assembly in the building services industry will raise productivity, reduce cost and improve quality.

WEB Building Services offers a quick, reliable and competitive service of pre-assembly and pre-fabrication of structural supports and Unistrut metal framing.

Benefits include:

- Flexibility
- Cost Savings
- Time Savings
- Quality
- Productivity

WEB is an authorised distributor of Unistrut.
